Due to the high risk nature of the industry, recycling businesses are often hit hard by the high cost of insurance. Partnering with a broker who knows your industry and is actively working to reduce your exposures can trim these costs. Enter Assurance. We work as an extension of your company to minimize risk and maximize the health of your organization.

Our connections with both local and national carriers allow us to customize a business insurance or benefits program that best fits your company needs. Committed to the recycling industry, we’re actively engaged in multiple associations including Construction & Demolition Recycling Association, National Waste & Recycling Association, Institute of Scrap Recycling Industries Inc. and International Association of Electronics Recyclers.

What We Do
Assurance’s services are exclusively designed to drive down costs by minimizing risk and maximizing the health of your recycling company. Start adding the right mix of services to your insurance program. Our menu of services includes:

- Risk Assessment
- Market Selection
- Account Management
- Claims Advocacy
- Safety Consulting
- Certificate Tracking
- Surety Bond Placement
- Wellness Consulting
- Compliance Support

In Addition
Aside from our variety of services, we also provide:

- Bi-lingual safety and risk consultants
- Expertise in managing recycling claims
- Risk management services which includes OSHA compliance and more

Our Passion
Our passion is to minimize risk and maximize health. Those four simple words are what we live by at Assurance. As an independent insurance brokerage, we look for unique ways to minimize risk that, in turn, impacts the health of your workforce and vice versa.

Through this passion we’re able to create real value for our clients that over the long-term can be measured and reported back to you by:

- Placing coverage
- Reducing losses
- Improving health
- Reducing expenses
- Helping your business expand
