CDRA President’s Message

HELLO! CDRA family

by Troy Lautenbach, President
Lautenbach Recycling
Mount Vernon, WA

I write this as we are all focused on running our businesses, as well as planning holiday parties and celebrating the season. We at the CDRA have been planning our annual party, the one we like to call C&D World, held March 9-12 in Brooklyn. Everything is almost set, and we feel this one might be one of the best yet. We have relevant content in sessions: Employee retention and recruitment, business diversification and biochar, to name a few. We also have exhibitors with all the latest technologies, two exciting facility tours, and our famous Monday night fundraiser. All taking place in Brooklyn, New York. Suggestion: book extra time and take in some great sightseeing.

Why do I feel the importance of attending our annual “party?” Yes, I know a few things about C&D recycling after 27 years in the business, but I always seem to learn something more at these meetings. Yes, I wonder if I should be educating others who could potentially compete with me, but they are likely from somewhere far away from my facility. Yes, I sometimes know most of what I’m going to hear in the sessions, yet I always get something useful to bring home to our company. Yes, I could contact a vendor and they would get me the information I need, but at the show, we can have a leisurely and useful conversation.

You get the picture, these are all important reasons, but that’s not why I attend. It’s because I’m the president and I have to! Just kidding, it’s my C&D family I get to see once again that’s truly special for me. It’s the stories we all share, the interesting places we visit, the adult beverages, Research & Development we engage in, but mostly the bonds of friendship that develops over time. I now have a C&D family spread out all over this great nation that I know I can always count on. This is what our annual “party” means to me. I hope to see you all in March in Brooklyn.

Besides serving as President of the CDRA, Mr. Lautenbach is President of Lautenbach Recycling, Mt. Vernon, WA. C&D

Register with code VP28 and save 25% on the conference program and get FREE Exhibit Hall admission

Over the past 50 years, we’ve helped usher in more significant innovations in the solid waste and recycling industry than any other event. And the future looks even more promising—14,000 of your peers, 609 exhibitors and 60+ educational sessions are waiting for you—all in the same place. WasteExpo. It doesn’t get any bigger or smarter than this. Visit wasteexpo.com to learn more.

Conference & Special Events: May 6-9, 2019 • Exhibits: May 7-9, 2019
Las Vegas Convention Center (South Halls) • Las Vegas, NV, USA
Regulations and legislation affect the C&D recycling industry strongly, in both a positive and negative manner. The CDRA promotes the viewpoint of C&D recyclers to regulators and legislators across the United States. By becoming a pledge member, you help us achieve our goal to make sure the message of the economic advantages of recycling, as well as the environmental advantages, are brought to the attention of policymakers at all levels.

We recommend you consult your tax professional for questions regarding the deductibility of donations to this fund.
C&D World Best Chance To Learn More About C&D

By Paul Kuhar, CDRA Convention Committee Chair
Construction and Demolition Recycling Association (CDRA)

As the CDRA’s new Convention Committee Chair, I am very excited to be a part of an amazing team collaborating with leading experts in the construction recycling industry to bring you C&D World 2019. My first C&D World show was in Nashville, TN in 2015 as our first construction recycling plant was opening its doors. I remember the feeling I had of amazement as I walked around and saw so many industry leaders that I had looked up to and read about in the trade magazines. This is what C&D World is all about, seeing some of the latest advancements in construction and demolition recycling, meeting new people, collaborating, and working together as an organization to advance the industry ahead to make a true change in C&D recycling.

We are excited to bring you a fantastic show in Brooklyn, New York this year with some incredible sessions. As construction and demolition recycling continues to advance so does technology and the potential opportunities outside the normal box or services we provide as operators. Our show will kick off discussing some of the latest technology advancements, current economic forecast, and a very hot topic that operators are faced with on daily basis, Recycling plant fires.

C&D recycling has evolved over the years which has allowed C&D recycling facilities the ability to create opportunities company-wide including additional jobs, additional recycling opportunities and new technology to address more material diversion from landfills. As operators we often find ourselves asking what does it take to find the right candidate? How do you stay ahead of the competition in a very competitive environment? What can you do to become more diversified in your current business model? These questions will be discussed during our Monday sessions as we layout labor force issues, diversification in business, and new lines of business that you can add to your current operation.

Diversification in your business can create an opportunity that you may have never thought possible. C&D World will conclude with two world class facility tours that will highlight what can be done with some of the latest state of the art technology available to our industry processing two very different material streams.

C&D World is a must attend for anyone involved in construction and demolition recycling, processing, hauling, and regulating to continue advancing the industry through education and processing.

See you in New York.

Besides serving as CDRA Convention Committee chair, Mr. Kuhar is Vice President at Champion Waste & Recycling Services, Dallas, TX

---

C&D World Best Chance To Learn More About C&D

By Paul Kuhar, CDRA Convention Committee Chair
Construction and Demolition Recycling Association (CDRA)
Executive Director’s Message
The Meeting That Matters For C&D

by William Turley, Executive Director
Construction and Demolition Recycling Association (CDRA)

More than 26 years ago I put together the first ever C&D World, which was in Chicago. The format wasn’t much different than it is today, with almost two days of information-packed sessions, a relatively small exhibit hall, and a tour of a local recycling facility. But the event was very well received, and from that sprang the C&D Recycling Association and 25 more C&D Worlds, leading up to the next event, March 9-12, in Brooklyn.

Last year’s meeting in Nashville was considered by all a major success, even though we were not able to provide a tour of a local recycling facility. That changes in Brooklyn, as we are offering two excellent tours: one of the most advanced MRFs in the world, Sims Municipal Recycling, and Cooper Recycling’s new mixed C&D plant, a sophisticated RCI-certified operation that is handling more than 300 trucks a day while making a variety of end products.

For 2019 we are focusing on some of the big issues facing the C&D industry—workforce questions, end markets, and diversification, among many others. These sessions have been created and organized by the CDRA’s Convention Committee, chaired by Paul Kuhar of Champion Waste & Recycling in Dallas, TX. One new addition for this year is that during the lunch on Monday, March 11, we will have roundtables set up so that participants can discuss issues with their peers from across the country.

Perhaps the biggest draw of the C&D Worlds over the years has been the opportunity to meet and talk with a recycler’s peers from across North America. There is a lot of overlap in the issues a processor faces no matter where they are located. Talking it out with those in similar situations can really help, and C&D World is the only place where the leaders of the C&D industry gather.

Mr. Turley is Executive Director of the CDRA.
Legislative and Regulatory Committee Update

by Brock Hill, Legislative Committee chair
Construction and Demolition Recycling Association (CDRA)

A central component of the CDRA is the work we do with governmental entities to further C&D recycling. Below is a report on some of the work we are doing, and what we are monitoring.

• The U.S. EPA convened a meeting of organizations to lay the groundwork for work to increase domestic end markets in response to the China situation. Those present were comprised of organizations and companies in the waste, recycling, and plastics industries, as well as several large companies, like Proctor & Gamble. Several top EPA officials, including Administrator Andrew Wheeler, were present. The original focus of the project was solely on curbside materials, but CDRA was able to get C&D recycling included in the meeting by pointing out that C&D recyclers handle a lot of paper (OCC) and plastics and are affected by the closed markets. We will participate in this action going forward.

• Recycling Infrastructure Bill - Several of the same organizations have been putting together legislation to get federal money to support recycling facilities purchasing newer and better equipment that will help clean up the end material stream. CDRA is monitoring this effort.

• CDRA has been working with the USGBC to solve issues with the recycling credits under LEED 4.0. LEED v4.1 was recently released with several changes we recommended, including a way to still gain points without having to source separate on site, and giving preference to recycling facilities certified by the Recycling Certification Institute. A huge win for transparent and legitimate recycling.

• CDRA participated in a meeting organized by the Vinyl Institute to promote the recycling of vinyl. The goal is to improve end of life options for vinyl, diverting it from landfills. Several large vinyl producers were in attendance, showing that the industry is serious about the effort. While C&D recyclers are always interested in new markets, we need those markets ready before collecting the material.

• California Tiered Regulations - California regulations allow facilities handling under 125 TPD to be regulated under far more lenient rules, with less rigorous permitting and reporting requirements. Some waste facilities are underreporting less than 125 TPD, but are in fact taking in as much as 500 TPD. In the latest Legislative Committee call, Brock Hill reported that while we all want to support new small businesses, established (and highly regulated) recyclers want to make sure there is an equal and level playing field. If those facilities are taking in that much material, they should have to meet the same standards as regular and legitimate recyclers. Premier Recycle Company and Michael Gross, Zanker Recycling, are part of an effort to have CalRecycle enforce its regulations. CDRA had written a letter of support for the enforcement of the regs.

• California (SF Bay Area Specific) Exclusive Solid Waste Franchises. Premier Recycle Company continues to work on a larger effort to open the market for C&D recyclers. The push for transparency through RCI and similar certifications has helped in showing regulators that closed systems through franchising and flow control are stifling the market, creating an incentive to cheat, and causing industry consolidation. While this may not apply to many members across the country, CDRA believes in fair competition.

• Kim Williams, Marpan Recycling, and Brock Hill, Premier Recycle Company, are working together to formulate a conversion system for CDRA members to show the tangible benefits of C&D Recycling. This conversion formula will allow members to input tonnage, and calculate the kWh saved by recycling in a usable form. For example, Marpan has shown that they save the amount of power needed to run the University of Florida.

• There are many legislative and regulatory issues that arise in every corner of the Country. CDRA encourages all members to serve on this committee to push our industry forward and be part of something bigger than our individual parts. Thank you to all who have helped!

Besides serving as Chair of the CDRA’s Legislative Committee, Mr. Hill is Vice President of Premier Recycle Company, San Jose, CA.
Recycling Certification Institute Update

Third-Party Certification Charges Out of the Gates in 2019

by Stephen M Bantillo
Executive Director, Recycling Certification Institute

The Recycling Certification Institute (RCI) ended 2018 on a high note and we are building on those successes in 2019. From the San Francisco Bay Area to the Midwest, the Northeast, and down to the nation’s capital, RCI has been engaged by numerous facilities who wish to become certified. The launch of LEED v4.1 raises the importance of third-party certification over the previous version.

The USGBC recently began a staged release of LEED v4.1 beta. Included in the new draft version is a pathway that addresses the issues related to onsite source separation for projects that arose with LEED v4. The simplest way I can describe the relevant changes for builders and why they will be looking for RCI Certified Facilities is as follows:

• An RCI Certified Facility that accepts Mixed C&D has been verified as sending out three or more recoverable streams, and has at least a 50% recovery rate (w/o ADC), should satisfy Path 1b for 1 point.
• An RCI Certified Facility that accepts Mixed C&D has been verified as sending out four or more recoverable streams, and has at least a 75% recovery rate (w/o ADC), should satisfy Path 2b for 2 points.
• The Pilot Credit MRpc87 has been moved into the main body of Materials and Resources, thus it is no longer considered an Innovation Credit.

You can read more details of v4.1 beta via this link: https://www.usgbc.org/articles/preview-leed-v41-drafts. Note that v4.1 is in beta mode and the language is subject to edits for clarity. The USGBC is working to enhance the language with input from its users. We applaud the USGBC on these changes and RCI and CDRA will continue our work with USGBC to support a system of verified performance and transparency for the industry.

Please join us at C&D World in Brooklyn, New York, March 9-12, 2019. There you can visit the Northeast’s first RCI Certified Facility, Cooper Recycling, and see how they handle Mixed C&D generated in the nation’s largest city. See you there!

Stephen M. Bantillo is Executive Director of the Recycling Certification Institute and can be reached at info@recyclingcertification.org.

What Is Your C&D Facility’s Recycling Rate?
The Recycling Certification Institute has launched its online version of the Certification of Recycling Rates (CORR) program. This program provides credible, ISO-level third-party certification of C&D facilities’ true recycling rates.

Can You Prove It?
CORR is the only program that provides a credible, third-party look at the true recycling rates. It is the only program recognized by USGBC for the new extra point under LEED for using a certified recycling facility.

Why Become Certified with RCI?
• Government agencies want accurate reporting of C&D recycling rates from facilities
• Many green building programs require recycling of C&D materials
• LEED Specifies use of CORR to gain an extra point for your clients
• Verify your facility’s performance and have your recycling rate published with RCI
• Give your facility a marketing edge over the non-certified facilities

CORR is administered by the Recycling Certification Institute. For more information, including scheduling a recycling rate certification or to register your facility with the Institute, go to www.recyclingcertification.org

DEDICATED TO ADVANCING THE INDUSTRY

Becoming a CDRA member offers your business support and resources that can’t be found elsewhere. The CDRA promotes and defends the environmentally sound recycling of Construction and Demolition (C&D) material through a diverse and unified voice of members committed to sustainability.

CDRA members are an important part of association efforts as we focus on the future of C&D debris recycling over disposal.

CDRA members process millions of tons of: Asphalt, Concrete, Gypsum, Metals, Wood, Shingles, and more…

CDRA FOCUS

Founded as the Construction Materials Recycling Association (CMRA) in 1996, the association adopted the name Construction & Demolition Recycling Association (CDRA) in 2013 to best reflect its membership base: private sector businesses, public sector agencies and vendors to the C&D recycling market. There are a broad range of industries represented, including construction, demolition, public sector services, waste management services, rock and building materials companies, road construction companies, and more.

HELP YOUR BUSINESS STAY CONNECTED TO THE FOLLOWING:

• Regulations and Legislation that affect your business
  » Support with pending rules and regulation lobbying
  » Franchising, flow control
  » OSHA Silica rules

• LEED and USGBC trends

• Certification opportunities

• Fines
  » ADC
  » New product development

• Safety Issues

• Employee safety

• Fire Safety

• Technology advances
  » Screens
  » Shredders
  » Robotics
  » Gasification

• Annual meetings in great locations that include facility tours

• Shingle recycling activities, markets, trends and regulations

• Industry data and statistics available for use with customers, regulators and local and State government entities

• Comprehensive industry database with state-by-state regulations

• The latest industry news

• Finished Product Markets and Trends
