On June 26, 2020, the Occupational Safety and Health Administration (OSHA) announced a final rule regarding the implementation of lockout and tagging procedures. This rule is intended to ensure uniformity when addressing respirable crystalline silica (RCS) exposure in the workplace. The rule is designed to protect workers from the health risks associated with RCS exposure.

Improper procedures are a leading cause of fatal and severe injuries and remain an OSHA focus item. This webinar discusses what a complete lock out program consists of and provides a template for a lock out program. The webinar demonstrates how to develop a comprehensive lock out program that is easy to implement and maintain.

Thank you to DTG Recycling for sponsoring this webinar.

What advice would you give to someone interested in this industry?

Find them, train them, mentor them and this will free up your time and intellectual creativity to solve problems. It is extremely rewarding to look back at the end of the day and say, “that was a call a "Hold My Beer Moment"!”

What inspired you to join CDRA?

It is inspiring and energizing to be surrounded by like-minded individuals and organizations that are dedicated to a mission that is core to your belief system.

The CDRA provides just such a forum and provides a great avenue for transfer of technology and networking. When you face a technical challenge that was overcome to advance toward a new end product. CDRA events are a wealth of information and research for those interested in the C&D industry. The CDRA provide a process of developing the program for the only conference that focuses on specific information such as on concrete or wood, or it could be a useful technical challenge that was overcome to advance toward a new end product. More details of this contest will come out shortly, but take a minute to think about it and then take a minute to fill out your CDRA membership application in there as well.

The company is adding a CDRA membership link on its website and is making it easy for them to use the system for member management. DTG recycles all types of new construction and industrial, and manufacturing waste in the United States. The company serves the C&D industry.

The National Trade Association Dedicated to the Construction & Demolition Recycling Industry

For More Information, Contact CDRA at turley@cdrecycling.org; 630-258-9047. CDRA members are always looking for better ways to serve the C&D recycling and reuse and recycling market and C&D recycling?

The U.S. EPA, founded during the Nixon Administration, is 50 years old this year. The agency has grown to 18,000 employees and has many of the largest programs in the federal government. The agency has been called "the most controversial of the Cabinet-level agencies" by The Wall Street Journal. The agency is focusing its efforts on reducing pollution with a new emphasis on the importance of smart growth in order to meet sustainability goals.

Growing a business is not easy.
