Although not every news item is shared, we will review each submission based on its relevance to the industry. One would think this sector will have to grow in importance, but plastics:

One of the trends we are currently seeing at the local policy level is the creation of recycling incentives. As with many other parts of the country, markets for Alameda County C&D materials are in flux. The capacity of California's biomass energy sector has dwindled in the past several years, with a 75% reduction in active plants. As a result, the amount of C&D recycling has also decreased. Further, the used for C&D materials are in flux. The capacity of California's biomass energy sector has dwindled in the past several years, with a 75% reduction in active plants. As a result, the amount of C&D recycling has also decreased. Further, the used for C&D materials is being used less and less, and the amount that is recycled is also decreasing. The CDRA is working hard to ensure that the C&D recycling industry is able to continue to grow and become a major player in the national economy. To that end, the CDRA has been working with other organizations to develop new end markets for C&D recycling. We have also been working with government agencies to create incentives for businesses to recycle C&D materials. We believe that these efforts will help to ensure the continued growth of the C&D recycling industry.

The CDRA is dedicated to the construction and demolition recycling industry. We recognize the importance of staying in touch with the leaders of the industry. There are so many avenues to get involved, find the one that fits you best. Reach out to entities you feel are doing a good job in the industry and share your interest in learning more. Talk to everyone and anyone you can regarding the recycling.

CDRA Member Spotlight:

StopWaste is the County of Alameda's C&D Recycling Program. They provide education and outreach to residential households and the construction industry on how to reduce waste. They have a website where you can look up information on C&D recycling. StopWaste also manages the Green Halo System which is a voluntary program that helps facilities reduce waste. They have a variety of tools and resources available to help reduce, reuse, and recycle C&D materials. They have also created a variety of tools and resources over the years to help reduce, reuse, and recycle C&D materials. They have a variety of tools and resources available to help reduce, reuse, and recycle C&D materials. They have also created a variety of tools and resources over the years to help reduce, reuse, and recycle C&D materials.
